### Understand Common Code Selection to Avoid Undercoding.

Many providers undercode evaluation and management services and receive reduced reimbursement because they don't understand how to determine and document level of service. This instruction manual helps you code the highest level of service supported by the documentation and receive the payment these services deserve.

← Understand the most common code selection

← Reduce risk of audit

← Maximize your coding effectiveness

### Key Features and Benefits

*Ingenix Learning: Understanding E/M Coding* provides the basics on how to code evaluation and management in order to maximize reimbursement.

- **Updated for 2009.** Includes the new 2008 changes to evaluation and management coding.
- **IngenixEdge®—Clinical case studies.** Train coders and doctors using real-life case scenarios to which they can relate.
- **IngenixEdge®—Self-audit forms, including official CMS auditing form.** Helps ensure documentation supports level of E/M service coded to avoid claims denial.
- **IngenixEdge®—Audit scenarios included.** Helps users uncover areas of risk in their own organizations so that they can fix problems before a government audit.
- **Part of the Ingenix Learning educational series.** Use this in concert with other Ingenix publications and software for consistent, accurate training.
