## 2009 Ingenix Learning: Physician Offices

ISBN: 978-1-60151-206-2

Item Number: 1652

Available: December 2008

Price: \$89.95

### Learn the Fine Points of Physician Coding.

Build a stronger foundation of coding expertise with this one-of-a-kind educational tool that trains beginners in physician offices and groups to be effective coders. This course continues the skills learned in *Ingenix Learning: Medical Billing Basics*.

- ← Understand and retain the material being presented
- ← Ensure fast, accurate reimbursement through examples
- ← Help coders from other specialties learn physician coding

### Key Features and Benefits

*Ingenix Learning: Physician Offices* is a unique training tool tailored for coders and billers in physician offices and groups. This book makes the arcane information of coding texts, payer rules and reimbursement processes easy to understand and retain.

- **NEW! — Updated code sets.** In-depth overview of the latest CPT®, HCPCS and ICD-9-CM code sets and other coding systems with chapters on each system.
- **IngenixEdge® — Advanced content continues where *Ingenix Learning: Medical Billing Basics* leaves off.** Training and educational information for physician reimbursement builds on previously learned basics.
- **IngenixEdge® — Helps the user arm for physician-related payment systems.** Includes DME, RVU, APC and ASC information.
- **IngenixEdge® — Complete foundation for coding and billing.** Broad overview of the physician reimbursement process written by coding professionals for coding and billing professionals.
- **Effective supportive material.** Illustrations, graphs, coding tips and scenarios, glossaries and spot-lit sections ease understanding and put information into context.
- **Chapters for HIPAA and ICD-10-CM issues.** Prepare for these important developments in coding.
- **Part of the Ingenix Learning educational series.** Use this with other Ingenix publications and software for consistent, accurate training.
